

Services Recommended through ISCA listserv (10/18/09)

Compiled by Elizabeth Magin, Tony Hausner, and Carol Valoris

Note: The list now includes the dates when each service provider was recommended and any helpful comments, when available. In cases where no comments are provided, it is most likely because the person who asked for recommendations compiled the responses without the comments and forwarded the names to the various people who have maintained this resource over the years. In such cases, there is no record of the recommendations on the listserv; we can't go back and search for the comments. We hope this new and improved list is more helpful to more people.

Note: Washington Consumer Checkbook is an excellent source for information and covers some of these services. Yahoo groups is improved and one can do a search on many of these services and others in the message area of the group. Those items in blue are hyperlinks to the web sites.
